

FREE TRADE CHECKLIST

Know the trade before you make it

Six steps to run before any cards change hands. Tick each one.

- ☐ **1 Put both sides in.**
Scan each card or search it by name, set or number. Your cards go on one side, theirs on the other.

- ☐ **2 Set the printing, condition or grade.**
Check the corners, edges and surface first. Pick the exact printing, then the condition for a raw card or the company and grade for a slab. The price follows the copy you set.

- ☐ **3 Add any cash.**
If money is part of the deal, add it to the side paying it. Cash always counts at face value.

- ☐ **4 Read the verdict.**
Bartr adds up both sides and says fair, favors you or favors them. Fair means the gap is under 3% of the larger side.

- ☐ **5 Check the dealer rate.**
Some tables count your cards at a share of market, like 80%, and theirs at full value. Set each side to its rate and Bartr tells you when the two sides are valued at different percentages.

- ☐ **6 Record the deal.**
When you shake on it, tap Deal Complete to save the trade and update your collection. Share the receipt so both sides leave with the same numbers.

The numbers are only part of it. Finishing a set or getting a card you love counts too. And it is always OK to say no thanks.

Bartr adds up both sides of a trade for you. Scan the code or visit bartr.cards to get the app. [Free on the App Store](#), iPhone only for now, no account needed. Prices are estimates, not appraisals or offers.
